Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 8-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicants Admitted Prior Art in view of either JP 2-115362 or JP 11103914.

AAPA teaches, on page 1, line 18- page 5, that shape memory alloys are known and explains that all of the treatment steps as claimed are the typical way in which shape memory alloys are treated. AAPA however, does not teach making jewelry out of shape memory alloys. However, Both JP'362 and JP914 teach that it is old and well known to use shape memory alloys in the production of jewelry for the purpose of having an article of jewelry that maintains its shape. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the method as taught by AAPA by using it to make jewelry also, since to do so is old and well known in the art as taught by JP '362 and JP '914, for the purpose of maintaining the shape of the jewelry. Further, laser welding is an old and well known attachment technique and official notice is taken of such.

Allowable Subject Matter

Claims 5-7 and 12 -14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
